WORK EXPERIENCE

Frontend Developer

Freelancer. 2021 - 2024

- Designed and developed websites for commercial and personal projects, such as landing pages, single page applications, and interfaces to manage databases using Ruby on Rails.
- Implemented tailored frontend solutions using Bootstrap, Astro, React, Bulma CSS, and Node.js, optimizing website performance and user experience across diverse projects.
- Managed project deployment and maintenance on Netlify and GitHub Pages, ensuring 99.9% uptime and implementing robust version control using Git.

Fullstack Developer

WAAK Dev. October 2024 - now

- Web solutions development for large-scale operations, such as a control system for machinery operations and a personnel transport routing platform.
- Designed and launched React Native mobile applications with PHP backend, including a map routing app for bus drivers, improving route accuracy by 20%, and an employee timetable assignment app, streamlining scheduling for 500+ employees simultaneously.
- Maintained and optimized large codebases and VPS operations using cPanel and phpMyAdmin, ensuring system stability and improving database performance.
